

Freedom of movement when sitting

Keep it simple.

Design with added value.

Whether in black or light grey, se:motion emits a sense of dynamic lightness. Moreover, the style is far more than a mere design statement. The perforated backrest not only sets visual accents, but also ensures elasticity and maximum sitting comfort. The same applies for the ideally positioned lumbar curve and the ergonomically designed seat with slim edges – the impressive looking design ensures both a good posture and mobility.

High contrast.

The frame and the base are made of synthetic material and are available in black and light grey.

Moving.

The black castors are available for both hard and soft floors.

Minimalist.

Without the armrests, the swivel chair offers even more freedom of movement.
