Wire Management

Under-top power boxes

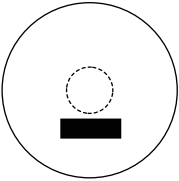

A power strip mounted under the table top is available for all of the Reverse Occasional 35 models. It is offered in two different sizes and power/data ports can be customized according to the following diagram:

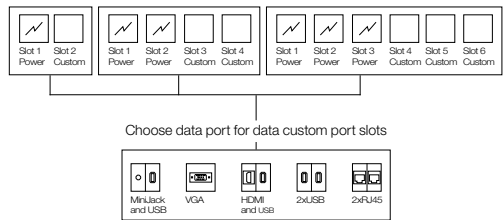

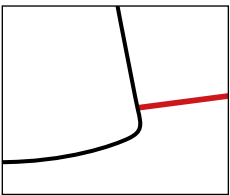

1 By default, power columns are centered with the Reverse base.

2 Wire pass thru a aluminum grommet, keeping it hidden.

1 Location of power strip
The standard location of the strip will be in the position indicated in the following diagram.

2 Wiring exit
The cable exits directly the power system or through a channel in the base so that it remains hidden until it reaches the floor.

		Top sizes	Table top Lacquered	Table top Oak	Table top Solid Surface	Table top Marble	Table top Compacto HPL	Table top Ceramic
