

# Onde

## PET Felt Acoustic Panel

Design Perrine Vigneron

The aesthetic take on an acoustic panel without compromising on sound dampening qualities. The panel is pressed from PET Felt and its design allows free placement and overlapping to create a unique composition.

## Specifications

- Material
- PET Felt
- Colour options
- Light Grey, Dark Grey, Olive, Marine, Green, Dark Green, Brown, Beige, Pink, Turquoise, Yellow
- Mount
- Magnet

## Ingredients

- PET Felt
- Magnet

## Acoustic & Aesthetic

The Onde is an acoustic system made out of pressed PET-Felt, which is made of recycled PET bottles which are turned into a soft, though strong Felt material. This PET Felt is long lasting, UV stabilized and above all has a great acoustic performance.

The Onde floats in front of the wall or below the ceiling. Because of this, sound waves aren't only absorbed by the material, but also gets caught in between and behind the panels.

Because of its organic round shape, you can create the composition you desire, and by that adapt the Onde to every room and space. The Onde is easily to attach by a smart magnetic system.

## Measurements

- Weight Onde – 1,3 kg
- Packed per 10 Ondes
- Maximum of 10 Ondes per box
- Package weight depends on the amount of Ondes
- Package size
- 82,5 x 74,5 x 26 cm; 0,16 m³

## Test results acoustic performance

PET Felt

PET Felt is made of recycled bottles which are turned into a soft, though strong Felt material, which is long lasting, UV stabilized and has great acoustic performance. PET Felt is both recycled as well as recyclable itself.

Martindale	Pilling
100.000	3/4

Note  
PET Felt is made of recycled material. Different products may have different outcomes in the colour blend.

## We create interior products by today's standards

De Vorm is established in a new era, we develop products by the standards of today. This means we produce efficiently, use the full lifecycle of products and eventually give them a new life.

Our emphasis lies on making a product that works, by setting a variety of conditions; it should be legible, accessible, but also environmental friendly and aesthetically perfectly in balance.

## We like a product because of its functionality

A good product makes life easier - it should be developed for helping us function better throughout the day. We firmly believe that the beauty of a design lies in the sum of functions that makes it a complete product.

## We continuously raise the bar

From the very first sketches we start combining and developing new techniques to find new possibilities to innovate. Our design process is infused with technical development; techniques result in aesthetic features and the other way round.
