PET Felt

PET Felt is made of recycled bottles which are turned into a soft, though strong Felt material, which is long lasting, UV stabilized and has great acoustic performance. PET Felt is both recycled as well as recyclable itself.

Martindale	Pilling
100.000	3/4

Note  
PET Felt is made of recycled material. Different products may have different outcomes in the colour blend.

Bespoke options

Customize every element.

Our Nook Lounge Chair is designed to be fully customizable. From its shell, the cushions and the frame - the options are there to make it blend in or stand out in any context.

Packed per one chair

Made of recycled plastic bottles

Highly customizable

Easy to clean

Eco label fabrics

Recycled and recyclable

Winner of the iF Design Awards 2017

## We create interior products by today's standards

De Vorm is established in a new era, we develop products by the standards of today. This means we produce efficiently, use the full lifecycle of products and eventually give them a new life.

Our emphasis lies on making a product that works, by setting a variety of conditions; it should be legible, accessible, but also environmental friendly and aesthetically perfectly in balance.

## We like a product because of its functionality

A good product makes life easier - it should be developed for helping us function better throughout the day. We firmly believe that the beauty of a design lies in the sum of functions that makes it a complete product.

## We continuously raise the bar

From the very first sketches we start combining and developing new techniques to find new possibilities to innovate. Our design process is infused with technical development; techniques result in aesthetic features and the other way round.
