

# Cabale

Work desk with manual or electrical height adjustment

## Description

The Cabale series was originally designed by the Danish design-duo, Lise & Hans Isbrand, in collaboration with Holmrís 1996. In 2005, the series was relaunched and today, Cabale is considered a modern collection of work desks and meeting tables that all contribute to an active work environment.

With the Cabale work desk the designers have combined classic and timeless design with current trends to create an elegant and functional desk for any office space. The desk is characterized by the unique and iconic shape of the legs, which result in a desk that makes a statement in any office.
