

Ag Arm is a sophisticated and stylish display mounting system for LCD monitors up to 40lbs. Designed for integration atop all Innovant furniture products, Ag Arm can also be intelligently specified to prevent collisions with adjacent monitor arms and privacy panels on adjustable height desks. Ag Arm's modular parts enable the creation of a broad array of mounting solutions with independent height adjustment for each arm.

Technology is rapidly evolving and Innovant's Ag Arm ensures that investments made today will continue to benefit users in the future. The ability to utilize Ag Arm's interchangeable parts to adapt and upgrade mounting arrangements is an integral benefit of the product. At any time, users can choose from Innovant's list of recommended configurations or select from Ag Arm's various posts, arms and accessories to create or modify a workspace display.

Dynamic Displays
Multi-Tier & Multi-Screen

Ag Arm can be configured in two tiers to support as many monitors (up to 30") as can fit within the desk footprint.

Adjustment and Alignment
Easy Vertical Modifications

Ag Arm can be adjusted vertically on support posts and locked into place with a simple lever. Spring-assisted arms add fine-tune positioning of monitors to create a perfectly aligned multi-screen display.

Controlled Footprint
Anti-Collision Configurations

Developed specifically for deployment in multi-screen environments, Ag Arm eliminates the possibility of collisions with components on adjacent adjustable height desks. Using a combination of variable arm lengths and rotation restrictors, Ag Arm ensures the most effective fit and alignment of monitors within the footprint of each desktop.

Track Mounting
Easy Horizontal Modifications

Ag Arm posts connect to the accessory mounting beam at the back of NEO trading desks. Simple thumb screws allow for rapid installation and lateral repositioning. Speed of installation and relocation is the fastest in the trading desk market and the rigidity of the desk frame prevents monitor vibration.

From one to eight monitor arrangements, Ag Arm provides virtually endless display configurations for a truly tailored experience.

The product offers complete user-adjustment and positioning of monitors to create the optimal ergonomic display.

Ag Arm Features

Quick Lock Lever

Quick Release Mechanism

Advanced Cable Management

Visual Spring Tension Gauge

Beam-Less Worktop Clamp

Beam Mounting Plate

Power Center

Laptop Tray

Color Options

Silver

White

Black

Ag Arm standard finish is silver. The product is also available in white or black, though additional lead time may apply.

Heavy Duty Arm

The Heavy Duty Ag Arm is a dynamic spring arm engineered to support one to two monitors with a combined total weight of 35-40lbs (depending on mounting method.) The Heavy Duty Arm has an enhanced dynamic spring and special VESA mount capable of managing the weight of heavier monitors. Heavy Duty Arms can be mounted on a base with clamp, through desk grommet, or on a post.

Dual Rail

The Ag Dual Rail is an accessory mounting option to the Heavy Duty Ag Arm. The Dual Rail replaces the single monitor VESA mount to provide single arm support and adjustment for two monitors up to 27" with a combined weight of 35lbs or less.

Modern. Intelligent. Tailored.

Innovant provides advanced, integrated design that supports forward looking technology for today's connected workplace.

A recognized leader in the industry, we focus on integrating seamlessly into the overall architecture of a space, optimizing real estate, promoting employee productivity, and ensuring long term value to the client business. Innovant's adaptable open plan workstations, conference solutions, private office designs and specialty furnishings are available to view in showrooms worldwide.

We know that our clients navigate complex decisions when choosing a furniture system. Innovant provides expert guidance along the way, collaborating with client teams to determine optimal product configurations. Where appropriate, we will recommend and engineer tailored solutions based on specific client requirements. Every Innovant product is designed for efficient installation and easy reconfiguration over time as new features are introduced.

Sustainability

Environmental stewardship is a primary component of Innovant's core philosophy. One of our key missions is to minimize our impact on the environment and to ensure our products are environmentally sustainable. All of our standard products already conform to a variety of eco-requirements and many items can be further configured to maximize LEED points.
